### **REAL LIFE 4 KIDS**

In 2015, the Curro Century City Grade 5 group embarked on a journey that would give them real life experiences, within the classroom.

Real Life 4 Kids was introduced and the Learners had a ball! From purchasing plots of land through auction, building their homes, paying transport costs, taxes and utility bills, the learners were given a unique opportunity of experiencing what life is like in the “real world”.

Each class was tasked with building up their own town and the challenge of earning and avoiding paying penalties was the order of the day. This is a “great hands” approach for learners to experience day to day living. The programme comes with support and advice, and solutions to potential problems is only an email away. I would fully endorse any school thinking about or looking at, providing learners with a different perspective to how life runs on a daily basis.

The learners thoroughly enjoyed the concept.

Kind regards
