

*Llandudno Primary started playing Real Life 4 Kids with our grade 5 class in 2014. We had such fun, and the children loved it so much, that we included the grade 7 class in 2015.*

*We find it a wonderful motivator for the children as they become very competitive about earning money! In grade 7 we concentrate on the entrepreneurial side more and incorporate Real Life 4 Kids into their EMS curriculum. They love formulating their business plans, creating marketing material and earning money from their endeavours.*

*With the support of the Grade 5 and 7 teachers, we have very successfully incorporated the game into the CAPS syllabus on many levels – Mayoral speeches in English, Rights and Responsibilities in LO, budgets in Maths, building in Science and Tech, house design in Art etc etc. It is very exciting to see the game board (the cities) develop and grow as the houses, business premises and buildings are created.*

*We have been very happy with the introduction of Real Life 4 Kids into our school and the Grade 4s cannot wait until their turn next year!!*
